

TECNOCLIN

COMÉRCIO, MANUTENÇÃO E CALIBRAÇÃO DE EQUIPAMENTOS MÉDICOS

Medical Oxygen Sensors

The only source for all OEM and replacement respiratory and anesthesia O2 sensors

Analytical Industries Inc.

✓ Unmatched Quality Control

Every sensor is subjected to extensive quality assurance testing providing you with documented test results and the most reliable oxygen sensors available today. (See back page)

✓ Longest Expected Life

Our technology offers the longest life in the industry.

✓ Realistic Warranty

Sensors are warranted for up to 18 months based on 60-70% oxygen levels. Don't be misled! Get the facts!

✓ Superior Service

The most common products ship within 24 hours. Knowledgeable engineers and service representatives are trained and ready to assist.

✓ Unmatched Quality Control

...the organization continually improves the effectiveness of the quality system and takes action to eliminate the causes of nonconformities

Following each critical operation in the assembly process, every sensor is tested to confirm signal output using equipment traceable to calibration certificates.

Once the assembly is complete, the critical performance parameters of every sensor are verified by an automated test protocol which generates two reports that identify both data points and PASS/FAIL test results as illustrated below and pictured left.

OLOS Automated mV Final Test Protocol

①

Sensor (1-60)	Output in Air (mV)	Output in Air	Linearity to 100% O2	Output at 100% O2	Stability at 100% O2
1	11.5	PASS	PASS	PASS	PASS
2	12.0	PASS	PASS	PASS	PASS
3	11.0	PASS	PASS	PASS	PASS
4	11.5	PASS	PASS	PASS	PASS
5	12.3	PASS	PASS	PASS	PASS

②

Sensor (1-60)	Output in Air (mV)	Specification Test Parameters		Stability over 100 Readings		Linearity to 100% O2	Stability to 100% O2	1	99	100
		Min Pass	Max Pass	Min	Max					
1	11.54	53.84	56.6	54.79	54.9	PASS	PASS	54.79	54.90	54.88
2	12.01	56.02	58.9	57.25	57.33	PASS	PASS	57.27	57.33	57.32
3	11.05	51.54	54.18	52.65	52.75	PASS	PASS	52.65	52.75	52.73
4	11.55	53.87	56.64	55.17	55.25	PASS	PASS	55.17	55.22	55.25
5	12.33	57.52	60.47	58.99	59.05	PASS	PASS	59.00	59.23	59.20

Serial numbers are assigned only to sensors that pass all aspects of the OLOS Final Test, thus establishing traceability.

By simulating operating conditions, the OLOS Final Test establishes documented confidence in the quality and performance of sensors accepted into inventory for shipment to customers.
